

ifp Excursion

Hexagon Geosystems in Aalen

June 2, 2016

Organized by ifp for GEOENGINE Master Students (2nd semester)

The excursion was organized by Institute for Photogrammetry, aim to provide GEOENGINE MSc. and Geodesy & Geoinformatics BSc. students the opportunity to take a closer look at Geoinformatic industry. Hexagon Geosystems, as a market leader in information technologies, provides us an illustration on its hardware and software products in detail through the excursion. The most impressive part is that the lecturers provided really deep and detailed information about CCD and CMOS sensors.

Many thanks to Institute for Photogrammetry and Dr.-Ing. Cramer for arranging this wonderful excursion for us!
